

SATYAM KUMAR PANDEY

Full-Stack Web Developer (MERN) • Software Engineering Student

GitHub | LinkedIn | satyampandey8686@gmail.com | +91-9235125107

PROFESSIONAL SUMMARY

Product-focused 3rd-year Computer Science Engineering student specializing in the **MERN stack** and **Python**. Proven experience architecting full-stack applications and contributing to production-level open-source codebases during an **IIT Ropar** internship. Driven by a strong algorithmic foundation and an active focus on integrating **Artificial Intelligence** models into modern web platforms.

TECHNICAL SKILLS

Frontend React.js, Redux Toolkit, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3

Backend & Database Node.js, Express.js, MongoDB, Appwrite

Languages Python, C, JavaScript, TypeScript

Tools & Concepts Git/GitHub, RESTful APIs, System Automation, Local AI Integration, Data Analysis

EXPERIENCE

Full-Stack Web Developer Intern

Jan 2026 – Apr 2026

IIT Ropar (via NPTEL)

- Contributed to open-source **MERN stack** projects, focusing on core development and feature integration of **Vi-Slides** and **Vi-Sakha**.
- Submitted and merged verified pull requests, utilizing production-level **Git** branch workflows under the direct guidance of university professors.
- Earned official certification in **MERN stack** development upon successful project evaluation.

Participant / Developer

2025

Smart India Hackathon (SIH)

- Architected a real-life waste management application framework.
- Collaborated with a team to brainstorm, design, and structure core features for the final presentation.

FEATURED PROJECTS

MegaBlog Application | React, Redux Toolkit, Appwrite

- Built a comprehensive, full-stack blogging platform featuring secure user authentication and robust state management.
- Architected the backend database routing to handle dynamic post creation, editing, and data persistence seamlessly.

Local AI Voice Assistant (Jarvis) | Python, Local ML Models

- Developed a local voice assistant system utilizing asynchronous **Python** libraries.
- Integrated local machine learning models to process voice commands entirely offline, focusing on system automation and rapid response times.

CodeForGate Reference Portal | HTML, CSS, JavaScript

- Developed and deployed a custom reference website (codeforgate.netlify.app) serving as a centralized hub for engineering study notes.
- Structured the platform to host comprehensive **C** programming language documentation, prioritizing fast load times and readability.

EDUCATION

Gaya College of Engineering (BEU Patna)

Bachelor of Technology in Computer Science Engineering

Expected Graduation: 2027

Currently in 2nd Year (4th Semester)

CERTIFICATIONS & ACHIEVEMENTS

- MERN Stack Development Certification** – IIT Ropar (2026)
- Elite + Gold Certification in Python** (90% Score) – NPTEL: “The Joy of Computing using Python” (2025)
